Committee**

## Expectations Creed:

- **The Design Process for a school is not a straight line.** I will expect ups and downs, give and take, requests and concessions, moving ahead and circling back, and compromise. With that understanding, the process can be fun and rewarding.
- **Just because I requested something doesn't mean it will be included in the project.** To be included, my request has to meet the requirements of the project goals, the budget, the schedule, and the overall concept. It should be explained, however, why my idea was not incorporated.
- **The Architect may show me solutions which could be beyond the budget** in order to understand design priorities and to find the best solution. The Architect should be clear whether a solution is affordable or not.
- It is unlikely that I can afford the **Best Solution Possible**, but the Design Process will allow me to select the **Best Solution I Can Afford.**

Make Design Decisions ● Document Design Decisions

# HIGH SCHOOL AERIAL VIEW

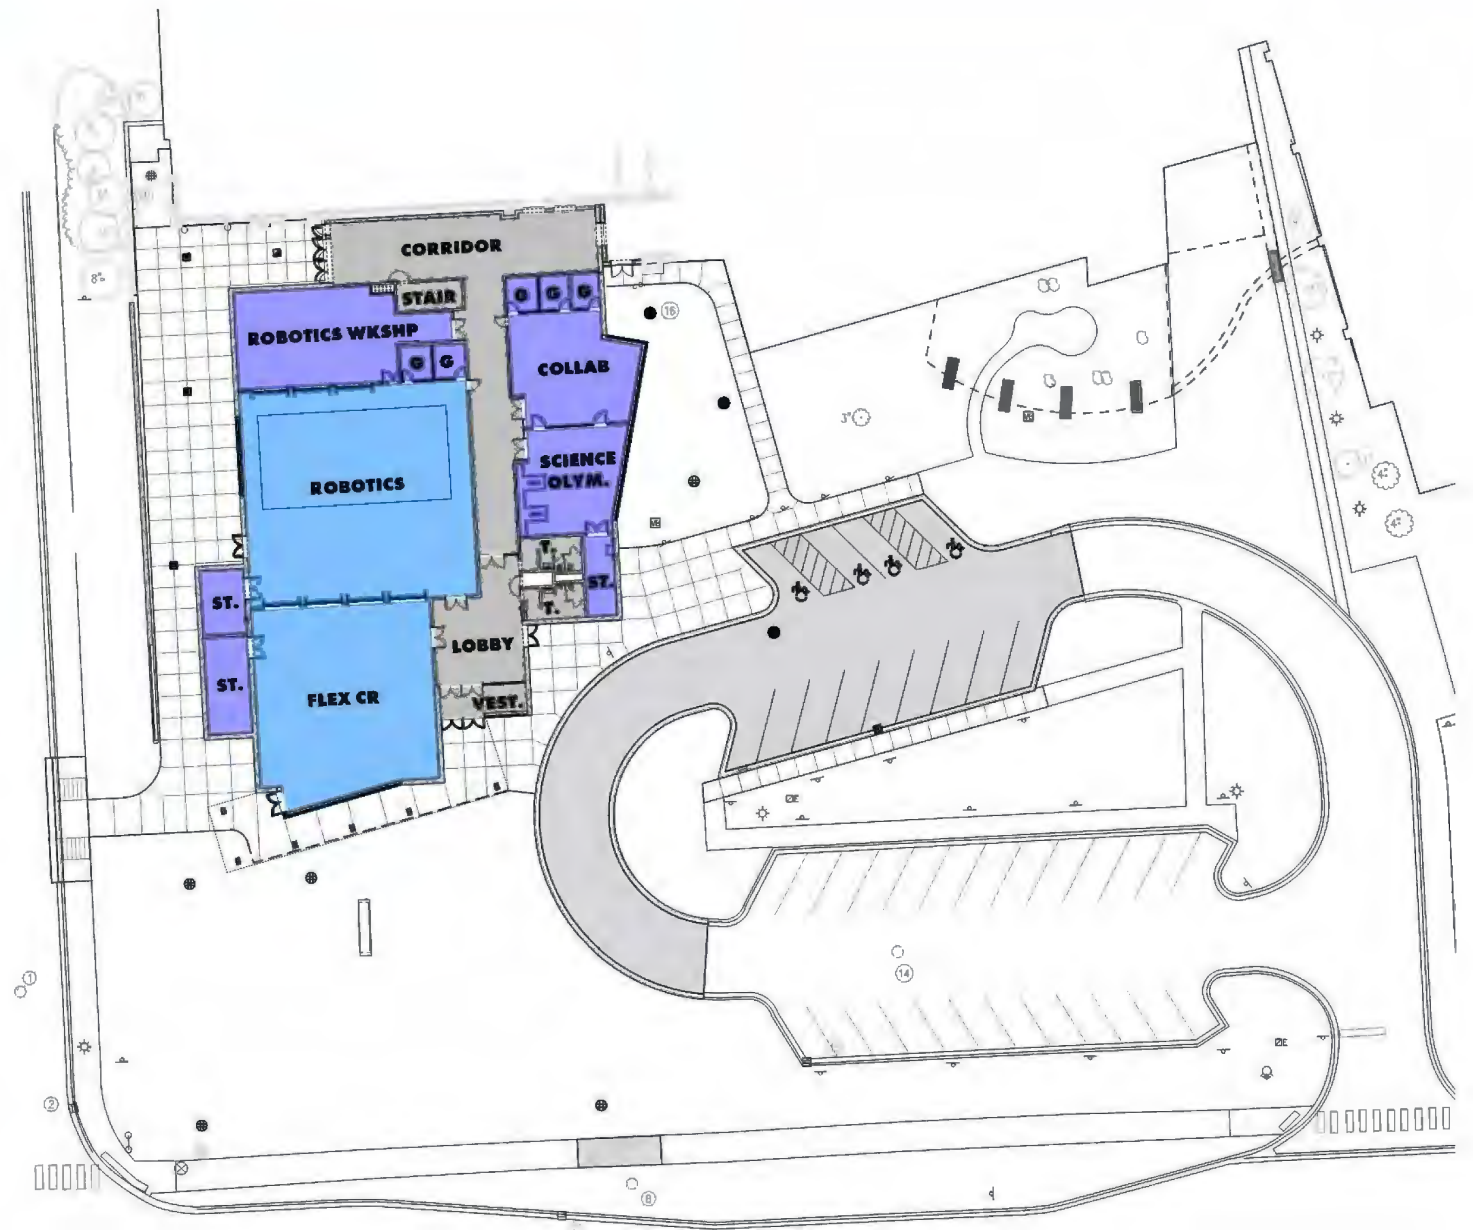

# SITE/FLOOR PLAN- STEAM ADDITION

## SAS K-12 Steam Vision (draft):

Saline Science, Technology, Engineering, Arts, and Mathematics programming will support students in developing a design-thinking mindset anchored in empathy, research, creating and solving real-world problems that will equip them to thrive in a global society and benefit the broader community. From in-school opportunities to extension experiences to club participation, all SAS students will have access to STEAM.
